

Essential books for product builders.

A curated collection organized by jobs-to-be-done. Three books per category, all completed, all worth your time.

1 Strategy: how to think about markets and positioning

2 Execution: shipping products that actually work

3 Leadership: managing teams through ambiguity

4 User insight: understanding what people really want

5 Systems thinking: seeing the whole, not just the parts

6 Communication: writing and persuading with clarity

7 Classics only: books that have stood the test of time
